Summary

Results-driven Azure DevOps Engineer with hands-on experience in CI/CD pipeline design, automation, cloud infrastructure, and DevSecOps practices. I specialize in Azure Pipelines, GitHub Actions, and Jenkins for streamlined software delivery, and leverage tools like Terraform, Docker, and Kubernetes for scalable deployments.

I've integrated security into DevOps workflows using Fortify, WhiteSource (Mend), SonarQube, and Checkmarks to ensure secure, compliant, and high-quality code.

My recent work includes automating infrastructure provisioning using Terraform and PowerShell, implementing containerized environments, and optimizing deployment reliability in agile teams.

Key Tools: Azure DevOps, Terraform, Jenkins, GitHub Actions, Kubernetes, Docker, Python, PowerShell

☁️ # Platforms: Microsoft Azure, AWS

DevSecOps: SonarQube, Fortify, Checkmarks.

Certified: Microsoft AZ-900, Cybersecurity Simulation (Tata Forage)

I'm actively seeking challenging Azure DevOps opportunities where I can contribute to building secure, scalable, and automated cloud solutions.
